ABOUT ME

I have a strong interest in technology. Currently, I'm working with cutting-edge technology to solve real-world problems. My skills include problem solving, web development, and programming in Python and Java. I'm also proficient in using Git and GitHub. This tech background allows me to tackle a variety of challenges effectively.

PROJECTS

Alumni Portal   2023–Present

Frontend web development

Developing a comprehensive Alumni Portal with features including user registration, event management, and alumni directory, enhancing engagement and communication within the alumni community.

Water Leakage Analysis and Prediction   2023–present

UI Design and Web development

Designing and developing a real-time water leak detection and conservation system, leveraging cutting-edge hardware and machine learning algorithms to optimize water distribution networks, save water resources, and enhance environmental sustainability.

User Management Bot   2021–2021

Developed a Python Telegram bot to track user activities, rewarding them for a cryptocurrency project, implementing automatic payments using the Binance API, Event Remainder , Social Media Management in the Telegram application.
